babies are uncomfortable at teething time! And mothers are worried because of the little upsets which come so suddenly then. But there's one sure way to comfort a restless, teething child. Castoria - made especially for babies and children! It's perfectly harmless, as the formula on the wrapper tells you. It's mild in taste and action. Yet it rights little upsets with a never-

failing effectiveness. That's the beauty of this special children's remedy! It may be given to tiny infants—as often as there is need. In cases of colic and similar disturbances, it is invaluable. But it has every-day uses all mothers should understand. A coated tongue

calls for a few drops to ward off constipation; so does any suggestion of bad breath. Whenever older children don't ear well, don't rest well, or have any little upset, a more liberal dose of this pure vegetable preparation is usually all that's needed. Genuine Castoria has Chas. H. Fletcher's signature on the wrapper. Doctors prescribe-it.

Each day he told them what a great pitcher he was and how lucky the Cardinals were to have him. But the Cardinals have a lot of good pitchers, so "Dizzy" was shipped back to the Texas league. Sunday he arrived in Houston at 2 o'clock, reported to the Buffaloes, went to the mound at 3:30 o'clock, and one hour and thirty minutes later, left the mound with a 6 to 0 victory over Wichita Falls. He stopped the Spudders with three hits. The win shoved Houston into second place ahead of Beaumont and Dallas.

#### BATTLE AGAINST TIME IS RENEWED AT AUSTIN MONDAY

MANY MAJOR BILLS STILL DEMANDING ATTENTION **LEGISLATORS** 

AUSTIN, May 4.—(A)—Faced with the passage of appropriation bills and several other bills of major import, the legislature resumed its battle against time again today when only eight working days before sine die adjournment, May 12.

working days before sine die adjournment, May 12.

It was predicted, however, the legislature would remain in session longer than 120 days.

The date for sine die adjournment was expected to be considered in the house today when a resolution by Rep. Anderson of San Antonio to adjourn a week from tomorrow, was set to be called from the table. An amendment was offered to the resolution last week to hold over to May 16 and Rep, Johnson of Carrizo Springs proposed a substitute to stay until May 22.

The lack of leadership in both branches on major legislation was ideplored by many, who declared that if important bills could not be passed in 120 days, it would be useless to work after May 12. The "go home" group indicated it would oppose bitterly any effort to prolong what they termed "the agony."

The calendars of both houses were heavy with the weight of pending legislation. Few bills were passed last week, the senate spending most of the week debating a truck regulation bill.

The senate had pending several special orders, employes reporting special orders, employes reporting enough to keep the senate busy the rest of the session without touching the rest of the calendar. Several senators favored extending the session ten to fitteen days.

The house calendar was filled with suspension requests, members making a frantic effort to obtain passage of their pet measures.

Use a good massage cream on this, rubbing it well into the skin with up and down motions, across the lines. A hot cloth over the skin, helps, since it opens the pores and more cream can be taken up. And an ice rub afterward helps, too. This should be used on the back of the neck as well; it will prevent catching cold by making the skin less sensitive to drafts.

#### **INCREASED NUMBER** OF FARMS SHOWN IN THIS CENSUS AREA

NAVARRO COUNTY MAKES ESPECIALLY GOOD SHOW-ING IN THE DISTRICT

That the federal government has taken cognizance of the increased number of farms in this census district is indicated by a letter received recently by E L. Dupuy, census director, from W. L. Austin, chief statistician for Agriculture, Bureau of Census, Department of Commerce.

partment of Commerce.

With the exception of Limestone county, each of the counties in District Sixteen showed an appreciable increase in the number of farms, and the amount of acreage. These facts are explained by Mr. Dupuy by pointing out that in most of the counties, many large estates have been divided into smaller farms, principally in charge of tenants. The increase in charge of tenants. The increase in acreage is probably due almost entirely to the clearing and putting into cultivation of bottom lands, and to the conversion of grazing land to tilled soil.
